

QGIS: State of Texas

The objective of this PDF view (and corresponding tutorial) is to examine an 11 year time span (between 1933 and 1944) regarding The University of Texas Austin's campus. Between 1933 and 1944 the University underwent massive expansion. By underlying modern-day data, viewers are able to see how basic city features like roads might have been altered to make way for the University's growth such as the case with the streets of Whitis and Speedway.

The red 1933 stars indicate UT Austin landmarks no longer present in 1944. The red 1944 stars indicate new buildings that had been built since 1933. The red labeled polygons are but two of the new buildings seen on the 1944 map not seen on the 1933 map.
